

The Lisbon Water Department is pleased to report another successful month of providing safe, reliable drinking water to the residents of Lisbon and Lisbon Falls. Throughout July 2026, the water system remained fully compliant with applicable state and federal drinking water regulations. Our team continues to focus on water quality, proactive maintenance, infrastructure improvements, and long-term system reliability.

💧 Safe Water You Can Trust

Protecting public health remains our highest priority. During July:

- All 7 routine Total Coliform Rule (TCR) compliance samples were collected and found absent of coliform bacteria.
- Arsenic levels remained well below the EPA Maximum Contaminant Level.
- Corrosion control and disinfection systems operated within established target ranges.
- Lead and Copper Rule sampling continued, with results received to date remaining well below regulatory action levels.

⚙️ Infrastructure & System Improvements

We continue investing in infrastructure that supports long-term system performance:

- SCADA and control system improvements continued at both treatment facilities to enhance monitoring and operational efficiency.
- Work continued on recently installed storage tank mixers that will improve water quality and circulation within the storage tanks once fully operational.
- Staff continued proactive assessments of critical facilities to support long-term system planning and reliability

🔧 Reliable Water Service

The Lisbon Water System continued to operate reliably with no significant service interruptions reported during the month. Treatment facilities at Moody and Bauer Water Treatment Plants provided consistent service while meeting seasonal water demands.

July by the numbers:

- More than 16.6 million gallons of drinking water were treated and delivered to customers.

✅ Commitment to Safety

Safety remains a core value for the Lisbon Water Department and Woodard & Curran.

During July:

- The team reached 327 consecutive days without a lost-time accident.

🔧 Maintenance & Customer Service

Keeping the water system running smoothly requires ongoing maintenance throughout the year.

In July, staff completed:

- Meter reading and customer service activities throughout the service area.
- Utility mark-outs through the Dig Safe program to protect underground infrastructure.
- New service installations and repairs within the distribution system.

💙 Why This Matters to You

The work completed each month helps:

- Deliver safe, high-quality drinking water
- Maintain reliable water pressure for homes and businesses
- Improve system reliability and resiliency.
- Reduce emergency repairs and service disruptions.
- Protect critical infrastructure for future generations

✅ Investing in Our Team

We continue building a strong, prepared workforce:

- Staff continued professional development to enhance technical knowledge, safety awareness, and operational readiness
