

The Lisbon Water Department is pleased to report another successful month of providing safe, reliable drinking water to the residents of Lisbon and Lisbon Falls. Throughout June 2026, the water system remained fully compliant with all applicable state and federal drinking water regulations. In partnership with Woodard & Curran, we continue to focus on water quality, proactive maintenance, infrastructure improvements, and long-term system reliability.

 Safe Water You Can Trust

Protecting public health remains our highest priority. During June:

- All 7 routine Total Coliform Rule (TCR) compliance samples were collected and found absent of coliform bacteria.
- Arsenic levels remained well below the EPA Maximum Contaminant Level.
- Orthophosphate and chlorine treatment systems operated within established target ranges.
- Distribution system water quality monitoring confirmed continued compliance throughout the system.

 Control Systems & Equipment Improvements

We continue investing in infrastructure that supports long-term system performance:

- Electrical upgrades at the Ann Street facility were completed.
- These improvements enhance system resiliency, reliability, and operational efficiency

 Spring Flushing Program Completed

The annual hydrant flushing and inspection program, which began on May 11, was successfully completed on July 7.

During flushing operations, crews:

- Flushed water mains throughout the distribution system
- Inspected hydrants for operational readiness
- Collected flow, pressure, and chlorine residual data
- Identified maintenance needs before they become emergencies

This important annual program helps maintain water quality, verify hydrant performance, and improve system reliability.

 Commitment to Safety

Safety remains a core value for the Lisbon Water Department and Woodard & Curran.

During June:

- No safety incidents or lost-time accidents occurred.
- Daily safety meetings were conducted.
- Staff completed workplace violence awareness training.
- The team reached 267 consecutive days without a lost-time accident.

 Did You Know?

Did you know that Lisbon's drinking water is tested hundreds of times each year? Operators routinely monitor chlorine, pH, arsenic, orthophosphate, bacteria, and other water quality parameters to ensure the water delivered to your tap meets or exceeds state and federal drinking water standards.

 Why This Matters to You

The work completed each month helps:

- Deliver safe, high-quality drinking water
- Maintain reliable water pressure
- Extend the life of critical infrastructure
- Reduce emergency repairs and service interruptions
- Improve long-term operational efficiency

 Investing in Our Team

We continue building a strong, prepared workforce:

- Staff participated in regional emergency preparedness training, including a risk assessment workshop and full-scale tabletop exercise
- Training focused on emergency response, system resiliency, and coordination with regional partners
- Ongoing professional development ensures your water system is managed by a skilled and prepared team

 Have Questions or Need Assistance?

If you have any questions about your water service or notice an issue, please contact the Lisbon Water Department at: **207-353-3020**

Clean Water. Reliable Service. Community Commitment.

The Lisbon Water Department and Woodard & Curran remain proud to serve our community. Through ongoing investment, proactive maintenance, and a commitment to excellence, we continue to deliver safe, dependable drinking water every day.

Thank you for your continued trust and support.
