SUBJECT: Walking Path in the Winter

DATE: 8/13/2024

Glenn and Sarah,

I am writing to discuss the possibility of maintaining the Androscoggin River Trail (ART), Miller Trail, and Ricker Trail during the winter months to accommodate foot traffic.

Logistically, our Department could plow the Miller and Ricker sections with no problems. The Androscoggin River Trail would need a snow blower to move the snow due to the tight turns and elevations along the switchback and bridge. This area needs to be clear by contracted or Public Works sidewalk blower.

Our Department could do the plowing sections within our work plans as needed. We would prioritize the Town Office and other building parking lots each storm. After our priority sections are completed, we would groom the trails at Beaver Park and plow the Miller and Ricker trails.

Estimates that are within the scope of plowing the areas mentioned:
4 hours each storm, depending on the depth and weight of the snow. Could be 2 or it could be 6 or more. $1800.00 labor for 6 hours for 15 storms
Gas: $750 in fuel
Snow blowing it would be a PW or Contractor

Regards,

Mark Stevens
