MEMORANDUM FROM THE INTERIM PUBLIC WORKS DIRECTOR

TO: GLENN MICHALOWSKI

FROM: STEVE AIEVOLI

SUBJECT: PAVING & ROAD STRIPING RFP'S

DATE: MAY 28, 2024

Glenn,

Please find attached the Paving and Road Striping RFP's for FY2. Below is a brief description of each.

1. For paving, I have 470' of Hatch Road, which is just beyond Young Road from Ferry, All of Maple Street and 100' of High Street at the intersection with Summer Street, this would fix/repair that section of roadway, pitch it properly and ensure the catch basins are receiving all storm flows. The storm flows currently coming down Summer Street go around the catch basin in the area I am proposing. This causes washouts below the intersection that PW has to repair several times a year.

   I also added a request for a bid alternate to the supplemental section of the Paving RFP. This alternate would be to reclaim and repave all of High Street instead of just the repair so we can determine whether we can fund the paving as it was previously proposed plus do the portion of Hatch Road.

2. The Road Striping is the same as FY24 with Littlefield Road and Village Street added back to the list, these roads were taken off the list when they were paved. PW staff will stripe the painted sidewalk on Davis Street when the crosswalks and turn arrows are completed.
